

Khant Wai Yan

Software Engineer | Full-Stack & Backend Systems

khantwaiyan11@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | +66 98 572 0280 | Bangkok, Thailand

Summary

Full-Stack Software Engineer experienced in working directly with business owners to define product requirements, translate operational needs into technical solutions, and build production-ready applications end-to-end. Builds and owns delivery across frontend, backend, APIs, databases, authentication, automation, and production deployment.

Technical Skills

Languages:	JavaScript, TypeScript, Java, Python, SQL
Frontend:	React.js, Next.js, Tailwind CSS, shadcn/ui, Redux
Backend:	Node.js, Express.js, REST APIs, JWT, OAuth
Databases & Cache:	MongoDB, PostgreSQL, Oracle DB, Redis
DevOps:	GitHub Actions, Nginx, PM2, Hostinger VPS, Vercel, AWS EC2
Testing Tools:	Jest, Vitest, Puppeteer, Postman
Third Party Libraries:	Stripe, Cloudinary, Brevo, Resend, Better Auth

Work Experience

Freelance Software Engineer

Production E-commerce Platform for a Retail Client | MERN Stack, TypeScript, Redis

Jul, 2025 - Present

- Partnered with business owners to translate retail operations into requirements and owned end-to-end delivery of a customer storefront, and administrator dashboard managing the orders, products, delivery pricing, and payments.
- Streamlined manual QR payments by automating checkout totals and centralizing receipt verification against bank transactions, and supporting receipts, resubmissions, cancellations, and refund recording.
- Centralized exchange-rate management and distributed rate updates to customer and administrator applications using Server-Sent Events (SSE).
- Automated catalog imports from 3 external sites, importing 100+ products into a staged workflow where administrators reviewed and approved listings before publication.
- Built order management from placement through purchasing, packing, and delivery, enabling administrators to update fulfillment status and customers to track their current orders progress.
- Preserved checkout prices, exchange rates, shipping and delivery fees in order snapshots, retaining the original pricing basis for payment review and refund calculation.
- Implemented customer sign-in and account recovery while restricting admin functions through role-based authorization, JWTs in HttpOnly cookies, refresh token rotation, Google OAuth.
- Owned production API deployment and operations on a VPS using Nginx and PM2, with health checks, and monitoring for operational visibility, plus input request validation, and rate limiting.

Fleet Management & Financial Dashboard | PERN Stack, TypeScript, Redis

Nov, 2024 - Present

- Centralized operations for a 20-vehicle taxi business by translating owner requirements into driver assignment, maintenance, and renewal workflows using PERN stack.
- Built financial reporting to expose collections gaps and vehicle profitability, uncovering outstanding revenue and net income from collection and expense records.
- Built driver deposit tracking to make refundable balances traceable, calculating balances from an append-only history of deposits, deductions, and refunds.
- Secured shared fleet operations with servers side role and ownership checks, giving authorized users access to the respective vehicle and financial records.
- Enabled fleet work during connectivity outages by building cached views and queued updates, with conflict handling and duplicate-safe synchronization.

Websites for Local Computer Shops | Next.js, TypeScript

Apr, 2023 - Aug, 2023

- Designed, developed and deployed responsive websites for 2 local computer businesses in Myanmar, translating stakeholder requirements into user-friendly websites that established an online presence.

Junior Software Engineer

MPT (Myanmar Posts and Telecommunications)

Sep, 2022 - Feb, 2023

- Developed internal financial tracking features using Spring Boot APIs, helping streamline financial data workflows and reduce manual reporting time by 30%.
- Optimized Oracle SQL queries and supported backend testing, debugging, and API integration, improving data retrieval performance by 25% and application reliability.

Education

University of Sunderland - B.Sc. Computer Systems Engineering, First Class Honours

July, 2022

Gusto University - HND in Computing (Software Engineering)

January, 2022

Wall Street English - Diploma in English

January, 2022
