

Khant Wai Yan

Software Engineer | Full-Stack & Backend Systems

khantwaiyan11@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | +66 98 572 0280 | Bangkok, Thailand

Summary

Full-Stack Software Engineer experienced in working directly with business owners to define product requirements, translate operational needs into technical solutions, and build production-ready applications end-to-end. Builds and owns delivery across frontend, backend, APIs, databases, authentication, automation, and production deployment.

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, SQL
Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Redux
Backend: Node.js, Express.js, REST APIs, JWT, OAuth
Databases & Cache: MongoDB, PostgreSQL, Oracle DB, Redis
DevOps & Tools: GitHub Actions, Nginx, PM2, Hostinger VPS, Vercel, AWS EC2
Testing & Integrations: Jest, Postman, Puppeteer, Stripe, Cloudinary, Brevo, Resend

Work Experience

Freelance Software Engineer

E-commerce Platform with Admin Panel | MERN Stack, TypeScript, Redis

Jul, 2025 - Present

- Partnered with business owners to identify operational needs, define product requirements, and design customer and admin workflows.
- Built and shipped those workflows across React frontends, Node.js APIs, MongoDB data models, and production infrastructure, covering orders, delivery pricing, payments, and product management.
- Implemented secure authentication and authorization using JWT HttpOnly cookies, refresh token rotation, Google OAuth, email verification, password reset, and role-based access control for customers and admins.
- Built an end-to-end QR payment verification workflow connecting customer payment-proof submission with admin review, resubmission, refund and order-cancellation flows.
- Built an SSE-based FX rate service with 5-minute refresh intervals, automatically synchronizing currency rates across customer and admin applications and eliminating manual updates.
- Automated product ingestion by building scraping pipelines that imported 100+ products from 3 external sites into a staged admin-review workflow before publication.
- Owned production deployment and operations for the API on a VPS using Nginx, PM2, MongoDB, and Redis, adding health checks, monitoring, validation, rate limiting, and security controls.

Fleet Management & Financial Dashboard | PERN Stack, TypeScript, Redis

Nov, 2024 - Present

- Worked directly with the business owner to analyze fleet operations and translate business requirements into a centralized internal management system.
- Built workflows for a 20-vehicle taxi business covering driver records, vehicle operations, expense management, license-expiration notifications, and repair scheduling.
- Implemented authentication and role-based authorization to secure owner-only access across financial and operations management modules.
- Built responsive dashboards and reporting features to improve financial visibility and streamline day-to-day fleet management workflows.

Websites for Local Computer Shops | Next.js, TypeScript

Apr, 2023 - Aug, 2023

- Designed, developed and deployed responsive websites for 2 local computer businesses in Myanmar, translating stakeholder requirements into user-friendly websites that established an online presence.

Junior Software Engineer

MPT (Myanmar Posts and Telecommunications)

Sep, 2022 - Feb, 2023

- Developed internal financial tracking features using Spring Boot APIs, helping streamline financial data workflows and reduce manual reporting time by 30%.
- Optimized Oracle SQL queries and supported backend testing, debugging, and API integration, improving data retrieval performance by 25% and application reliability.

Education

University of Sunderland - B.Sc. Computer Systems Engineering, First Class Honours

July, 2022

Gusto University - HND in Computing (Software Engineering)

January, 2022

Wall Street English - Diploma in English

January, 2022
