

Khant Wai Yan

Backend-Focused Full-Stack Software Engineer

khantwaiyan11@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | +66 98 572 0280 | Bangkok, Thailand

Summary

Software Engineer experienced in building and deploying full-stack web applications across e-commerce, fleet management, and content platforms. Skilled in TypeScript, Node.js, Express.js, React.js, Next.js, MongoDB, Redis, Nginx, and PM2, with hands-on experience in REST APIs, secure authentication, admin dashboards, scraping pipelines, and VPS deployments. Experienced in translating business requirements into production-ready systems.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Backend: Node.js, Express.js, REST APIs, JWT, OAuth, Redis, MongoDB, PostgreSQL, Oracle DB
Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Redux, Framer Motion
DevOps & Tools: Git, GitHub, GitHub Actions, Nginx, PM2, Hostinger VPS, Vercel, AWS EC2
Integration & Testing: Cloudinary, Brevo, Stripe, Postman, Puppeteer, Figma, Jest

Work Experience

Freelance Software Engineer

E-commerce Platform with Admin Panel | MERN Stack, TypeScript, Redis Jul, 2025 - Present

- Delivered customer and admin e-commerce applications supporting 4 main workflows: inventory management, order administration, location-based delivery fees, and product classification, and Cloudinary media storage.
- Implemented secure authentication and authorization using JWT HttpOnly cookies, refresh token rotation, Google OAuth, email verification, password reset, and role-based access control for customers and admins.
- Developed QR-based manual payment verification workflows with payment proof uploads, admin review, resubmission requests, refunds handling, and order cancellation handling.
- Delivered currency exchange rates through Server-Sent Events (SSE) with 5-minute refresh intervals, reducing manual price update overhead across customer and admin interfaces.
- Built automated scraping pipelines that imported 100+ products from 3 fashion brands (Uniqlo, Zara, and H&M), with draft/staging workflows for admin review before publishing.
- Deployed and managed the API on a Hostinger VPS using PM2, Nginx, MongoDB, and Redis, with health-check endpoints, monitoring, request validation, rate limiting, and secure headers.

Fleet Management & Expense Tracking System | PERN Stack, TypeScript Nov, 2024 - Present

- Developed an internal management system for 20-vehicles taxi business, centralizing 5 core workflows: driver records, vehicle tracking, expense management, license expiration notifications, and repair scheduling.
- Implemented authentication, role-based authorization systems to secure owner-only access across financial and operations management modules.
- Built responsive dashboards, and reporting features to improve financial visibility and streamline day-to-day fleet management workflows.

Websites for Local Computer Shops | Next.js, TypeScript Apr, 2023 - August, 2023

- Designed, developed and deployed responsive websites for 2 local computer businesses in Myanmar, translating stakeholder requirements into user-friendly frontend solutions that improved online visibility.

Junior Software Engineer

MPT (Myanmar Posts and Telecommunications) Sep, 2022 - Feb, 2023

- Developed internal financial tracking features using Spring Boot APIs, helping streamline financial data workflows and reduce manual reporting time by 30%.
- Optimized Oracle SQL queries and supported backend testing, debugging, and API integration, improving data retrieval performance by 25% and application reliability.

Education

University of Sunderland - B.Sc. Computer Systems Engineering, First Class Honours

Graduated: July, 2022

Gusto University - HND in Computing (Software Engineering)

Graduated: January, 2022

Wall Street English - Diploma in English

Graduated: January, 2022
